Lilabs

• CURRENT

May 2026 – present

Freelance Chief AI, Technology & Product Officer (CATPO)

Research & development at the intersection of **MusicTech** and **LiveTech**
Product strategy, technology architecture and exploration of AI solutions for the music and live industries

regrets.app

● CURRENT

2025 – present

Founder

Solo Product Builder: from idea to shipped product (App Store / SaaS) end to end — discovery, design, code and release

Ulk — an AI agent framework for Claude Code (59+ agents, skills, rules) that industrialises the idea → prototype → delivery cycle

Stack: Next.js, Astro, SwiftUI, TypeScript, Tailwind CSS, Bun

HEYA (Here You Art)

2025

Head of Product

From discovery to a shipped MVP, solo: technical audit, competitive analysis (12 platforms), stakeholder interviews, then design, architecture and full development

Complete MVP (profiles, network, messaging, offers, multilingual fr/nl/en) built with Claude Code and Ulk, an in-house AI agent framework — stack Next.js 15, TypeScript, Tailwind

CSS, Drizzle ORM

24-month strategic roadmap (acquisition, retention, monetisation)

Prototyped LLM integrations (Llama, Mistral) for profile enrichment and moderation, GDPR compliant

CH-Studio × GE HealthCare

2025

Senior Product Manager

Strategic audit of a DICOM data management platform (medical imaging, 1,100+ users)

Delivered a plan of 50+ recommendations and an 18-month roadmap

Groupe Actual

2023 – 2024

Senior Product Manager

Designed and launched a time-savings-account microservice for 500+ companies — automation through the Urssaf/MSA APIs

Digital transformation of a 15-year-old legacy finance application towards a cloud-native architecture — discovery with CFOs and HR staff in the field

Managed cross-functional teams of 12 people, Agile/Scrum

First uses of LLMs in product delivery: faster discovery, documentation and prototyping

Delivered 8 major releases, prioritised by business value

Bookr.fm (Music Data Studio)

2021 – 2024

Senior Product Manager

End-to-end product strategy, from discovery (bookers, artistic directors) to commercial launch
B2B SaaS for the artistic programming of festivals and music venues (40+ festivals in beta, 885K+ artist profiles)
UX/UI design and native API integrations (CRM, ticketing, accounting)

Fluidra (Blueriiot / Riio Labs)

2018 – 2021

Senior Product Manager, IoT

Migrated the flagship application to Flutter — cross-platform iOS/Android development
First AI / machine learning integrations in the IoT product: making use of sensor data (water quality analysis, treatment recommendations)
Field discovery with installers, maintenance technicians and distributors
Full UX overhaul, with a measured drop in churn
US market launch, managed an international team of 8 across 3 time zones

Agencies, IT services & Freelance

2005 – 2020

Technical Project Director / Digital Project Manager

Technical direction at BETC — led the redesign of the Crédit Agricole website
Technical project direction for Europe's leading home-services company
Project manager — private social network for childminders (UX/UI, team coordination, SPIP/PHP)
Technical lead at Université Catholique de Lille — infrastructure migration, server administration, teaching Linux
Contributor to the open source CMS SPIP (until 2020)
Co-founder of Sacavin (wine startup) and **Take a Sip** (content creation agency)
Front-end development, mentoring on mobile/music projects

Skills Professional expertise

Product & Business Leadership

Product strategy, field discovery, roadmap and go-to-market
Complex B2B product transformation and legacy modernisation
Business-impact prioritisation, OKRs and product KPIs
Cross-functional leadership of teams up to 12 people

AI Strategy & Architecture

LLM architecture and agentic systems, orchestration, Model Context Protocol (MCP)
Selection and integration of proprietary and open-source models
RAG, prototyping and integration of AI capabilities into existing products
Ulk — in-house multi-agent framework
Evaluation of quality, latency, cost and hosting trade-offs

Technology & Delivery

Systems and API architecture, technical modernisation, CI/CD
TypeScript, React, Next.js, Astro, Tailwind CSS, Bun
Flutter, SwiftUI, SPIP, PHP
Git, Linux, macOS, cloud infrastructure
Hands-on delivery from prototype to shipped product

Product Analytics & Design

PostHog, Hotjar, behavioural analysis, feedback loops
Figma, UX/UI, Adobe Creative Suite, art direction

Tooling

Linear, Notion, Obsidian, Jira, Confluence
Git, VS Code, Claude Code, Xcode

Languages

French: native
English: full professional proficiency
Spanish: conversational

Education Background

Primarily self-taught across technology, product and artificial intelligence.

2022–2023

iOS programming — SwiftUI

Simplon.co, Lille

1997–2001

Documentary photography

Institut Supérieur d'Architecture Saint-Luc &
ARIAP, Tournai - Lille
